DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Species Group A

- (1) Hair styling appliance is a curling iron
- (2) Hair styling appliance is a styling iron
- (3) Hair styling appliance is a hair dryer
- (4) Hair styling appliance is a flat iron
- (5) Hair styling appliance is a crimping iron
- (6) Hair styling appliance is a spiral iron
- (7) Hair styling appliance is a hair-setting tool

Species Group B

- (1) Input mechanism comprises one or more buttons
- (2) Input mechanism comprises a dial
- (3) Input mechanism comprises a switch
- (4) Input mechanism comprises a touch pad

Species Group C

- (1) Operational feature comprises a temperature setting
- (2) Operational feature comprises a sleep mode
- (3) Operational feature comprises a last-setting-recall mode

The species are independent or distinct because all species within Species Groups A-C are directed to related products. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, the respective species in each group have at least a materially different design, mode of operation, function, or effect.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from each Species Group A-C (i.e., one species per group) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 9, 18-20, 28-39 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
